Revised Syllabus re: Training of Probationary Assistant Commissioners in Engineering

WD 03607—GPB—22,500—2-8-35

Revised Syllabus re: Training of Prob. Asst. Comrs in Engineering

General and Revenue Secretariat. | File No. of 193 | (App. F. III-2

Letter no. 5035/34-35 dated 9th Sept. 1935 from the Rev. Comr forwarding a copy of revised Syllabus for the Course of Training of Pro. Asst. Comrs in Engineering

Subd

M (Mines file)

The Rev. Comr in his letter dated 27th May 35, stated that the general programme previously approved for the training of Probationary Assistant Commissioners in Engineering was somewhat rigid and promised to send a revised programme in the matter. Accordingly he has submitted the revised programme in consultation with the Chief Engineer.

P.

Though there are some changes regarding heads of training, the period of training remains the same. ~~This may perhaps affect~~ [In view of the fact that the Course of training in the Dt and Sub. Dn. offices has been increased by a further period of 4 months, in the case of Mr Humayun Mirza, Prob. Asst. Comr, the period of training fixed in the Fo dated 18th May 1934 is affected. The Rev. Comr has not sent up revised Course of training]

O (This may be taken up separately)

W

A draft Fo. approving of the revised Syllabus is, however, put up, for approval or other orders.

(K.MR 12/9/35)

Draft G.O. is for approval.

[Re effect of the extension of the period of training in some Depts. in the case of Mr. Humayuns Mirza, the question will be raised for separately].

Chief *Secretary to the Government*
of His Highness the Maharaja of Mysore,
~~*Development Department*~~, *Bangalore.*

SIR,

Reg. M (in the Index file)

I have the honour to invite reference to my letter No.C.5035, 34 dated 27th May 1935 regarding proposed modification of the course of training prescribed for Probationary Assistant Commissioners in Government Order No.3541/C.B.150-33 dated 18th May 1934.

2. In Government Order No.G. 9055-69/G.M.327-16-35 dated 4th January 1918 reproduced on page 62 of the Manual of General circulars and standing orders, a syllabus has been laid down for the Engineering training to be given to Probationary Assistant Commissioners; and according to the Government order of May 1934 the Probationers have to undergo this training for 3 months. The syllabus laid down in the Government order of 1918 appears to be too elaborate for Assistant Commissioners whose Revenue functions require only an acquaintance with the administrative work of the Public Works Department and who cannot within the course of three months which they can spare for the purpose, hope to acquire even a rudimentary knowledge of the technical aspects of Engineering. My idea therefore was to restrict the period of training in Engineering to one month and to associate Probationary Assistant Commissioners with the Executive Engineer of a Division or an Assistant Engineer, in order that the Probationers may get some practical acquaintance with the matters indicated below:-

Financing of Public Works -Irrigation, Road & Buildings

1) works charged to capital and to Revenue.
2) Minor tank Restoration Scheme.

3) Irrigation Cess Fund and its objects.
4) Famine Relief Programmes.
5) Works carried out from recoverable advances.
6) Road fund.
7) Acreage cess.

Execution of Public works -

1) Use of measurement books and preparation of bills.
2) Points to be noticed when inspecting works in progress (tanks, roads and buildings).

Maintenance of Public works.

1) System of regulating the supply of water under large irrigation works.

2) Estimates for annual repair of buildings.

3) Estimates for annual repair of roads (including special repairs)

Accounts.

1) Schedule of sanctioning rates.
2) Method of checking bills.
3) Work Registers. -
4) Compltion Reports.

General

1. Madras- Mysore Agreement 1892.
2. Block System of irrigation.
3. Relation with other Departments (including local bodies). Irrigation Regulation.

(Note- The Probationer may accompany the Engineer Officer on his tours of inspection for about a fortnight and spend the rest of the time in the Office).

The Chief Engineer who was consulted on the above proposals has stated in his demi-official letter No.279 dated 28th August 1935 (copy enclosed) that the course of training proposed above is suitable He however thinks that the period of training should be 3 months. He has further suggested that the ~~dm~~ study of text books as contemplated in the original Government order be omitted and that the Probationers may spend half the period of their training with an Assistant Engineer in charge of a sub division. and the rest of the period with the Executive Engineer.

4. Agreeing with the above suggestions made by the Chief Engineer, I enclose herein , a revised syllabus for the training of Probationary Assistant Commissioners in elementary Engineering for the approval of Government.

I have the honour to be,

Sir,

Your most obedient servant,

Revenue Commissioner.

G.R.

D.O.Letter No. 279 dated 28-8-1935, from the Chief Engineer-xxxxxx in Mysore, to the Revenue Commissioner in Mysore.

With reference to your D.O.No.C.5035/34-35 dated 14-6-1935, proposing certain modifications in the existing syllabus relating to the Engineering training of the Probationary Assistant Commissioners, I write to inform you that consequent on the transfer of control over the minor tanks in the State from the Revenue to the Public Works Department and other altered circumstances, the course of training in Elementary Engineering prescribed in the G.O.dated 4th January 1918 requires to be suitably modified. The study of Text books as contemplated in the original G.O, may I think be omitted. The course of training proposed by you seems to be suitable; but the period of training should, in my opinion, be three months, as the period of one month is too short to acquire any useful knowledge or experience. The Probationers may spend half the period of their training with an Assistant Engineer in charge of a sub division, and the rest of xxxx the period with the Executive Engineer.

Copy.
